### Courtiers Total Return Growth Fund

("the Fund")

A sub-fund of Courtiers Investment Funds ICVC  
("the Company")

Accumulation Share Class  
ISIN: GB00B1P2K855

This Fund is managed by Courtiers Asset Management Limited ("the ACD"), part of the Courtiers Group.

## Objectives & Investment Policy

The Fund seeks to achieve a total return comprised of income and capital growth, over 5 years.

The Fund will gain exposure to different asset classes worldwide such as company shares, commodities, cash instruments, bonds and real estate such as property. The Fund may also invest in deposits, funds managed by other specialist fund managers and investments issued by banks or governments that are a short term loan to the issuer by the buyer.

Derivatives (investments whose value is linked to another underlying investment such as shares or performance of a stock exchange) may be used to reduce risk and/or costs in the Fund and to generate returns.

This is an actively managed multi-asset Fund which means that the Fund Manager will select investments to achieve the Fund's objectives & policy. The Fund is not constrained by a benchmark.

When you hold Accumulation Shares you are not entitled to be paid the income from investments held by the Fund.

Any such income will automatically be reinvested into the value of the Fund on the last day of the relevant interim and/or annual distribution period. This is reflected in the price of an Accumulation Share.

You can buy or sell units in this Fund on any UK business day. Instructions must be received and accepted by Courtiers before 3pm in order for a deal to be placed at the price calculated on that day. Instructions received and accepted after that time will be dealt with at the price calculated on the next dealing day.

This Fund is appropriate for a retail or institutional investor, with an investment horizon of at least 5 to 10 years, who is prepared to accept some risk.

## Risk & Reward Profile

- ▶ The risk category above is a measure of the rise and fall of the share price of the Fund based on historical data. This means the more volatile the share price of the Fund, the higher the risk category will be.
- ▶ The Fund is in category 6 as the share price has experienced above average rises and falls historically.
- ▶ As the Fund's risk category has been calculated using historical data, it may not be a reliable indication of the future risk profile of the Fund.
- ▶ The Fund's category is not guaranteed to remain the same and may change over time. Please note that even the lowest category is not a risk-free investment.
- ▶ The value of your investment and any income you take from it may fall as well as rise and is not guaranteed. You might get back less than you invest.

The indicator above does not fully take account of the following risks of investing in the Fund:

- ▶ The Fund will make use of derivatives. A derivative may not perform as expected and may create losses greater than the cost of the derivative.

- ▶ The Fund may employ leverage by borrowing and the use of derivatives for investment purposes. The use of leverage may expose the Fund to volatile investment returns.
- ▶ Over-the-counter ("OTC") derivatives transactions may be entered into by the Fund and there may be uncertainty as to their fair value due to their tendency to have limited liquidity, and possibly higher price volatility.
- ▶ The Fund may be exposed to counterparty risk should a counterparty with which the Fund does business become insolvent resulting in financial loss.
- ▶ The Fund has exposure to a number of different currencies. Changes in exchange rates may adversely affect the price of shares you hold within the Fund.
- ▶ As the Fund may be invested in fixed interest securities, it is subject to the risk that a bond issuer does not meet its payment obligations. A lowering of the issuer's credit rating or of the bond itself may cause volatility in the price or reduce its liquidity making it more difficult to sell.
- ▶ The Fund may invest in emerging and developing markets, these markets typically carry higher risks such as counterparty, regulatory and/or market volatility risks.

For more details about the Fund's risks, please see the Risk Factors section in the Fund's Prospectus.

## Charges for this Fund

- ▶ The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.
- ▶ The Fund does not currently apply an initial or redemption charge. However, the ACD has the discretion to introduce such a charge at some future date.
- ▶ The ongoing charges figure is based on expenses for the year ending 30<sup>th</sup> September 2024, and may vary from year to year.
- ▶ The ongoing charges figure excludes the costs associated with buying and selling the underlying investments of the Fund (portfolio transaction costs).
- ▶ For more information about charges, please see the Charges section in the Fund's Prospectus.
