## Courtiers Investment Grade Bond Fund

("the Fund")

A sub-fund of Courtiers UCITS Investment Funds ICVC  
("the Company")

I Accumulation Share Class  
ISIN: GB00BYXVWY51

This Fund is managed by Courtiers Asset Management Limited ("the ACD"), part of the Courtiers group.

## Objectives & Investment Policy

The Fund seeks to achieve income and capital growth, through investment in a portfolio of investment grade securities, over 5 years.

The Fund will invest at least 90% of its assets in investment grade bonds worldwide. Investment grade is a rating which is BBB or higher from the rating agency Standard & Poor's or the equivalent rating of another internationally recognised rating agency such as Fitch or Moody's. The Fund is expected to have between 8 and 15 investment grade securities globally.

Derivatives (investments whose value is linked to another underlying investment such as shares or performance of a stock exchange) may be used to reduce risk or cost and/or to generate extra income and growth.

The Fund is actively managed this means that the Fund Manager will select investments to achieve the Fund's objectives & policy. The Fund is not constrained by a benchmark.

Accumulation Shares: any income from investments held by the Fund (dividends) will automatically be reinvested into the value of the Fund on the last day of the relevant interim and/or annual distribution period. This is reflected in the price of an Accumulation Share.

You can buy or sell shares in this Fund on any UK business day. Instructions must be received and accepted by Courtiers before 3pm in order for a deal to be placed at the price calculated on that day. Instructions received and accepted after that time will be dealt with at the price calculated on the next dealing day.

This Fund is appropriate for an institutional investor, with an investment horizon of at least 5 to 10 years, who is prepared to accept some risk.

## Risk & Reward Profile

- ▶ The risk and reward indicator is based on a combination of the volatility of the share price of the Fund, and the volatility of investments similar to those the Fund is invested in. This may not be a reliable indication of the Fund's risk and reward category in the future.
  - ▶ The Fund is in category 3 because funds of this type have experienced average rises and falls in value in the past.
  - ▶ The Fund's category is not guaranteed to remain the same and may change over time. Please note that even the lowest category is not a risk-free investment.
  - ▶ The value of your investment and any income you take from it may fall as well as rise and is not guaranteed. You might get back less than you invest.
- The indicator above does not fully take account of the following risks of investing in the Fund:
- ▶ The Fund may invest more than 35% of the value in Government and public securities of individual issuers as detailed in the Prospectus.
  - ▶ The Fund may be invested in fixed interest securities in one or a few geographic locations and could therefore be more vulnerable to market sentiment in that specific location. The Fund may also be concentrated in a number of securities which means that any losses may cause a proportionately greater loss to the Fund than if a larger number of investments were made.
  - ▶ The Fund is subject to the risk that the bond issuer does not meet its payment obligations. A lowering of the bond or issuer's credit rating may cause volatility in the price or reduce its liquidity making it more difficult to sell.
  - ▶ Investments in bonds are affected by interest rates and inflation trends which may affect the value of the Fund.
  - ▶ The Fund is subject to liquidity risk, which means that it may be difficult to buy or sell the securities.
  - ▶ As one of the objectives of the Fund is to provide income the ongoing charge of the Fund is charged against capital rather than income, this will enhance income returns but may erode capital and constrain future capital growth.
  - ▶ In adverse situations, the use of derivatives to reduce risk and/or costs in the Fund and to generate extra income may no longer be effective and the Fund may suffer a loss.
- For more details about the Fund's risks, please see the Risk Factors section in the Fund's Prospectus.

## Charges for this Fund

- ▶ The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.
- ▶ The Fund does not currently apply an initial or redemption charge. However, the ACD has the discretion to introduce such charges at some future date.
- ▶ The ongoing charges figure for the I Accumulation Share Class of this Fund is capped at the figure shown. The Fund's annual report for each financial year will reflect this charge.
- ▶ Ongoing charges exclude the costs associated with buying and selling the underlying investments of the Fund.
- ▶ For more information about charges, please see the Fees and Expenses section in the Fund's Prospectus.
